Let's Make: **Oobleck** | Supplies:

- 1.5 - 2 cups cornstarch
- 3 drops food colouring (optional)
- 1 cup water

Oobleck acts like a liquid when being poured, but like a solid when you apply force to it. You can grab it and then it will ooze out of your hands.

Instructions:

- ➔ Start with the water in a bowl and start adding the corn starch to it. You can use a spoon at first, but pretty quickly you'll be moving on to using your hand to stir it up.
- ➔ When you're getting close to adding 1.5 cups of the corn starch, start adding it in more slowly and mixing it in with your hand. The goal is to get a consistency where the Oobleck reaches a state that is the liquid and yet solid.
- ➔ Sometimes you will need more cornstarch. If so, keep adding more than the initial 1.5 cups. If you add too much, just add some water back into it. You will have to play with it to see what feels appropriately weird.
- ➔ Share a picture with us! Tell us how it went!
